

Notice the use of black accents used with October Mist. This railing is modern and metal which is why black looks right.

You can add the modern, fresh look with black picture frames and white mats. Choose a white as close to Snowbound as possible.

Notice the color of the natural rattan. You can create a similar look with a sisal-type of area rug in the foyer and first floor hall.

Add plants and stems to create a layered and intentional look by repeating the green color.

# October Mist

Add pillows to the bench in a pattern of green, gray, and white.

Consider a small area rug to anchor the bench.

Add a tall potted plant in the corner.

Add one framed artwork above the bench to coordinate with the gallery wall above it.

# Stairs

# Gallery Wall

Notice the mix of frames used. You can use all black or you can mix it up with black, wood tone, and white. Use all the same color mat, as close to Snowbound as possible.

Thank you for viewing this preview. This guidebook contained 8 additional pages of detailed instructions that included:

- Color palette for foyer and adjoining rooms
- Details of where to transition paint colors
- Instruction for the banister
- Suggestions of wall art and decorative object placement
